SUMMARY STATEMENT

I am passionate about creating easy-to-use and elegant UI that improves the day-to-day experience for users. I have strong programming algorithms skills. I'm a self-motivated person and eager to learn and grow.

WORK EXPERIENCE

Front End Developer, Famstar - *Sept/2021 - present* - Chandigarh, Haryana

Famstar is one of the best influencer marketing platform in the country.

⇢ Developing & maintaining high-performance and complex web application solutions with Next.js/React.js

⇢ Creating the user interface in Next.js, Javascript, CSS, and HTML, increasing the performance by 25%.

⇢ Building the project from scratch by using React.js, Next.js, Tailwindcss, and ant design as well.

Software Developer Intern, InnovativeCodeLabs - *Feb/2021 - Apr/2021* - Mohali, Punjab

InnovativeCodeLabs is an app development company and advanced marketplace software for every stage of your business life cycle.

⇢ Worked on Sharetribe Flex where I implemented new Components in React.js and corresponding Redux functionality for proper state management and providing backend data to the components

⇢ Built reusable components and we (a team of interns) also created a few projects using Sharetribe's Flex like GoHunting in React.js

⇢ Implemented and maintained user-friendly web applications using React.js, and Material UI as well.

Full Stack Engineer, Freelance Web Development - *Mar/2020 - Feb/2021*

⇢ Design and develop HTML, CSS, JS, React.js for a variety of sites and landing pages

⇢ Use AJAX Requests, REST API for obtaining data which was in JSON format

⇢ Optimize pages for the loading speed under 3 sec.

SIDE PROJECTS

Weather App: Weather App, which displays weather for up to 5 days. It shows the maximum and the minimum temperature for the day.

Recipes-Tracker: Personal Website especially for recipes like cakes, cupcakes, and biscuits, which allows customers to see all available products.
